-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Dragosh (6078886).

As per claims 1,10,14, Dragosh (6078886) teaches a method for processing speech audio in a client device (abstract) comprising:

“selecting a speech grammar....device” as selecting the grammar for the appropriate application (col. 4 lines 45-56);

“characterizing....grammar” as characterizing based on the application (col. 4 lines 58-61);

“based on the characterization.....server in the network” as downloading the grammar from the server if it is determined to be the grammar that is wanted (col. 5 lines 9-16, lines 30-50).

As per claims 2,15, Dragosh (6078886) teaches establishing a communication session and querying the speech server (col. 5 lines 27-45).

As per claims 3,16, Dragosh (6078886) teaches uploading the grammar (col. 5 lines 30-32).

As per claims 4,17, Dragosh (6078886) teaches registering the speech grammar (as loading the grammar with a returned handle (col. 5 lines 58-63)).

As per claims 5-9, 11-13,19-22, Dragosh (6078886) teaches determination of the type/size of grammar needed,i.e., complexity, (a stored “canned” grammar, vs. a

specialized grammar → col. 5 lines 32-37), determination of locations, including locally or remotely (either stored locally or at a specific URL – col. 5 lines 40-44).
